Tools / Platforms:	HTML, CSS, JavaFX, Visual Basic 6

PROJECTS / OPEN-SOURCE

ATM-Interface | Link   *Java, JavaFX*
- A Mini Project of Working of a Bank With Real Time User-Interface. In this, I made **a Real time JavaFX application user-interactive** which collects and verifies the Credentials from a sample DataBase defined in a class.
- This application works on **HashMap Data Structure**.
- After Successful login, the user can **perform numerous actions including Withdrawing the Balance, Deposit balance, Transfer the amount to another user** (userID must match in DataBase), **View Transactions History**. After work, user can log out and log in into other account.
- Extremely **safe and optimized** as all the members are declared privately.

CERTIFICATIONS

- Java 5 stars - **HackerRank**
